

Goncalo Miranda

Engineering Leader | Developer Experience & Platform Engineering | API & Microservices Architecture

Mississauga, ON L5H 4A8

(416) 7315707 | miranda.gs@gmail.com | [LinkedIn](#) | [Github](#)

PROFILE SUMMARY

- Experienced Engineering Leader with a strong background in backend systems, microservices, and API development using Mulesoft and Spring Boot.
- Focused on improving Developer Experience (DevEx) through better tooling, automation, and internal platforms that help teams deliver faster and with more confidence.
- Hands-on experience building and scaling CI/CD pipelines with Azure DevOps, Github Actions, Jenkins, and ArgoCD to improve reliability and deployment speed.
- Practical knowledge in observability, troubleshooting, and performance optimization using Elasticsearch, APM, and Splunk.
- Strong advocate for Radical Candor and Team Topologies, creating transparent, collaborative, and high-performing engineering cultures.
- Skilled in integrating distributed systems, event-driven architectures, and implementing secure API access with OAuth 2.0.
- Ability to mentor and guide technical leaders, align teams around DevEx goals, and drive continuous improvement in engineering practices.
- In my spare time, I enjoy staying hands-on with code — building side projects with Node.js and TypeScript, and currently learning React to expand my front-end skills.

WORK EXPERIENCE

Associate Principal Engineer

June 2025 - Present

EQ Bank, Toronto, Canada

Focused on Developer Experience (DevEx) and technical enablement across engineering teams, combining platform thinking, automation to improve productivity and satisfaction.

- Led DevEx strategy across the organization, including design and execution of the first company-wide DevEx survey to identify tooling, workflow, and cognitive load bottlenecks, driving targeted platform improvements.
- Evaluated Internal Developer Platform solutions (Backstage vs Cortex.io), leading the analysis and recommendation that resulted in adopting Cortex.io for engineering intelligence and service ownership visibility.
- Driving exploration of **AI-augmented SDLC (ASDLC)** through prototypes for AI-assisted design, coding, testing, and deployment workflows.
- Built an AI Engineering Assistant Kit introducing agents, skills, prompt principles, and starter workflows for developers and engineering managers, enabling teams to extend AI-assisted engineering practices.

- Developing a **LangGraph-based orchestration system** to safely execute AI-driven code changes across repositories.
- Working on an internal engineering operations app inspired by fleet/shift management models to improve ownership visibility and coordination.
- Implemented a GraphQL Backend-for-Frontend (BFF) layer to simplify API orchestration across web and mobile teams.
- Mentoring Staff+ engineers and partnering with leadership on DevEx improvement and engagement initiatives.
- Collaborating with senior leadership on DevEx gamification initiatives using data-driven insights to improve engagement and adoption of engineering best practices.

Associate Director of Engineering

January 2025 - June 2025

EQ Bank, Toronto, Canada

- Led an engineering pod responsible to manage Accounts, Accounts Linking, Taxes, Transaction History and Statements domains,
- Partnered with DevOps and Infrastructure teams to define the internal developer platform vision, improving CI/CD reliability and developer autonomy.
- Launched and led the Backend Engineering Guild, defining standards for code quality, observability, CI/CD, and service ownership.

Software Engineering Manager

July 2022 - December 2024

EQ Bank, Toronto, Canada

- Lead a team of talented software developers in the planning, design, implementation and delivery of software applications.
- **Drove platform enablement initiatives**, including
 - **Procurement and rollout of a feature flag mechanism (Harness.io)** to enable safer, incremental deployments.
 - **Advocacy for Trunk-Based Development** as a branching strategy across engineering teams, promoting faster feedback cycles and continuous delivery.
- Led my team through a successful migration from Mule 3 to Mule 4, ensuring a smoother integration layer and improved platform maintainability.
- Spearhead the successful implementation of a **prepaid card product**, resulting in increased customer engagement and new revenue streams.
- Developed **open banking-related services to read accounts and transaction information**, enabling secure access to financial data across multiple platforms.
- Oversee the development and maintenance of **accounts creation and management microservices**, ensuring smooth operation and scalability.
- Contribute to the vision and goals in alignment with business needs.

- Work with a recruiting team to hire high skilled candidates, ensuring continuous growth of the development team.
- Work with software developers, business analysts and product owners to maintain a prioritized backlog and create short term and long term deliverables.
- Cultivate a culture of Radical Candor and teamwork, driving performance and personal growth within the team.

Lead Software Developer

July 2020 - July 2022

EQ Bank, Toronto, Canada

- Led the development of microservices using **Mulesoft 3.9**, **Mule 4.4**, and **Spring Boot** (Spring JPA, Spring Batch, Spring Cloud) to create scalable, efficient backend solutions.
- Troubleshoot and resolve critical issues using **Elasticsearch** and **APM**, ensuring system stability and performance.
- Implemented CI/CD best practices with tools such as **Azure DevOps**, **Gitlab**, **ArgoCD**, **Maven**, **Artifactory**, **Jmeter**, **Munit**, **Newman**, and **Postman**, streamlining deployment processes.
- Developed and maintained an **automation testing pipeline** with **Postman** and **Jenkins**, significantly improving test coverage and release cycles.
- Integrated with distributed event streaming platforms to enable real-time data processing and analytics.
- Utilized **Microsoft SQL** and **MySQL** for efficient database management and querying.
- Collaborated directly with architects to design and implement innovative solutions, integrating **Redis** as a side cache and applying **OAuth 2.0** for secure authorization.
- Provided production support, addressing high-priority issues and ensuring system availability.
- Promoted software development patterns and Git best practices, fostering a culture of code quality and consistency across teams.
- Generated comprehensive documentation for QA teams, developers, and business analysts, enhancing communication and process clarity.

Software Developer

September 2019 - June 2020

Accion labs/IBM, Toronto, Canada

- Developed microservices and APIs using **Mulesoft Anypoint Platform** with **Mule 4**, adhering to best practices for scalability and maintainability.
- Troubleshoot critical system issues using **Splunk** and **Anypoint Monitoring**, ensuring high availability and system performance.
- Implemented CI/CD pipelines leveraging tools like **Azure DevOps**, **Git**, **Bitbucket**, **Maven**, **Nexus**, **JMeter**, **MUnit**, and **Postman**, improving deployment efficiency and automation.
- Built and maintained automation testing pipelines using **Postman** and **Azure DevOps**, optimizing test execution and validation.
- Developed backend services in **Java 1.7** and integrated them with **Microsoft SQL** for effective data management.

Software Developer

June 2018 - August 2019

ITSector SA, Portugal

- Developed microservices using **Mulesoft Anypoint Platform** for a backend platform supporting a **financial institution's internet banking** services.
- Implemented CI/CD best practices with tools like **Jenkins, GitHub, Maven, Nexus, JMeter, MUnit**, and **Postman** to automate and streamline deployment processes.
- Programmed backend services in **Java**, focusing on high performance and maintainability.
- Managed data using **MySQL**, ensuring optimized database performance and security.
- Collaborated in an **Agile & DevOps environment**, working with cross-functional teams to deliver critical features on time.

Head of BPM

February 2016 - May 2018

Bank Millenium Atlantico, Angola

- Managed IBM BPM assets, including **Process Apps** and toolkits, ensuring optimal performance and reliability.
- Developed **Java components** to integrate with the BPM platform, enhancing functionality and efficiency.
- Led the development of **Administration Services** for **Treasury Management**, including Coach View, Integration Services, and Web Services.
- Managed **Enterprise Content Manager (IBM FileNet)**, overseeing the implementation of a new document management plan.
- Gained experience in **Service-Oriented Architecture (SOA)** and web services, contributing to system integration and interoperability.

Software Developer

November 2010 - January 2016

Asseco PST, Portugal

- Developed services and coaches using **IBM Process Designer**, incorporating **HTML, CSS**, and the **Dojo Framework** to create user-friendly applications.
- Built **Java servlets** for integration with the BPM platform and created custom databases to store business data.
- Generated reports using **SQL Reporting Services** and developed components for integrating BPM with **IBM FileNet ECM**.
- Provided end-user training and helpdesk support for a banking institution in Angola, enhancing user engagement and satisfaction.

Software Developer

March 2009 - September 2010

Sebasi SA, Portugal

- Developed web applications using **JSF, Facelets**, and **Richfaces (J2EE)** for the **Portuguese Ministry of Labour and Social Solidarity**, contributing to the project [Relatório Único](#).
- Created standalone applications using **J2SE**, focusing on performance and usability.

- Generated PDF reports utilizing **FOP**, ensuring accurate and professional documentation.
- Accumulated two years of experience developing Java applications in both web and desktop environments.

EDUCATION

Bachelor's degree in Computer Science Engineering

2009

Escola Superior Tecnologia e Gestão, Portugal

PROFESSIONAL DEVELOPMENT

Enterprise Architecture

University of Toronto, ON

Mulesoft Integration and API Associate (Mule 3.9)

Toronto Metropolitan University, Toronto, ON

IBM Websphere Lombardi Edition 7.2, BPM Development

IBM

IBM Websphere Application Server, Core Administration

IBM

IBM Filenet P8 5.2 System implementation

IBM

VOLUNTEER EXPERIENCE

Volunteer

Rest Centre, Peel Region

2020 - 2021

- Contributed to the **website development** for an institution dedicated to raising **BIPOC youth out of housing insecurity** in Peel Region ([Rest Centre](#)).
- Coached students on **software development**, enhancing their technical skills and fostering their understanding of programming principles.
